

A focused line for small industrial components.

Parshwa Plastics makes small repeat-production plastic components for industrial machinery and equipment. The strongest fit involves metal inserts, overmoulding, machining after moulding, or a small completed assembly.

Examples of real production parts delivered.

EVIDENCE

What a representative can verify

- 40 years in production.
- ISO 9001 certified for 18 continuous years. Current certificate issued by TÜV Austria.
- Current Indian textile and automotive manufacturing customers have bought from Parshwa for more than 30 years.
- Real production proof. Photographs of 75 engineering parts and four illustrated case studies.

WORKING MODEL

What happens after an introduction

- Qualified RFQs acknowledged by the next business day.
- Complete standard RFQs normally quoted within three business days; complex part and tooling reviews normally within five business days after the required details are available.
- One commercial contact with direct factory technical support.
- A clear fit or no-fit answer and a specific list when information is missing.

WHERE TO SPEND TIME

Industrial OEMs and machine builders with a repeat component that fits the factory.

BEST-FIT ACCOUNTS

Good first opportunities

- Repeat-production parts for industrial machinery and equipment.
- An existing part needing a second source.
- A transferred tool that needs a responsive production home.
- A new component involving inserts, more than one moulding stage, machining, or assembly.

REP TERMS

Commission

- **8%** on collected Commissionable Net Sales up to US\$100,000
- **6%** on the portion from US\$100,000 to US\$1,000,000
- **3%** on the portion from US\$1,000,000 to US\$2,000,000
- **1%** on the portion above US\$2,000,000
- **3%** on collected tooling receipts
- Progressive commission is calculated separately for each approved named account per calendar year. A calculation statement and payment are issued within 15 days after cleared buyer payment.

WHEN YOU SEND AN RFQ

What happens next

1. RFQs are acknowledged by next business day; same-day acknowledgement where practical.
2. We flag missing drawings, material details, quantities, or shipping requirements.
3. Quote type clearly marked: budgetary or firm.
4. Simple complete RFQs are usually quoted within 3 business days; complex RFQs within 5 business days after required details are received.
5. Manufacturing notes where needed.
6. Direct technical and commercial follow-up.

FACTORY FIT

What belongs in the line

- Insert moulding and overmoulding.
- Machining after moulding.
- Small assemblies supplied inspected, assembled, and packed.
- One supplier responsible for the completed item, including agreed specialist operations where required.
- Not the lane: very large mouldings, commodity packaging or household catalogue products, stand-alone machining unrelated to a moulded component, or prototype-only work with no repeat-production path.

REP SUPPORT

What you get from us

- A gallery of 75 professionally photographed engineering parts manufactured by Parshwa.
- Four illustrated case studies and the current ISO certificate.
- Selected inspection and shipment documents when useful to a qualified buyer.
- Direct factory answers on technical questions.
- Commission statements and payment within 15 days after cleared buyer payment.
- Approved named accounts are protected in writing. Direct buyer-factory communication does not remove commission rights on an approved account.

LINE-FIT CALL

How to reach us

- 15-minute fit call to review the line, target accounts, and any active RFQs.
- Jinay Shah, Managing Partner | sales@parshwaplastics.in
- Book a call: calendly.com/jinayshah/parshwa-plastics-fit-call
